

# Gaspar & Co. Is Elevating Florida's Homes with Luxury Boutique Hardware

It has been an exciting year at Gaspar & Co. as they celebrate their 10th anniversary!

When it comes to architectural hardware that merges beauty, function, and heritage, **Gaspar & Co** stands out as a trusted name across Florida. Founded by Dan and Judy Mulloy, this Tampa-based business brings over 50 years of combined industry experience to the design and architectural community—delivering more than just hardware, but lasting impressions. From their beginnings in Historic West Tampa to their beautiful South Tampa showroom, their journey has brought them to the perfect location to proudly serve their valued clients across Tampa and Pinellas with the exceptional service and style they deserve.

Originally focused on serving the Tampa Bay area, including Clearwater, St. Pete, Sarasota, and Orlando, Gaspar & Co has grown its reach through word-of-mouth and reputation. Their work now extends to high-end residential and boutique hospitality projects in Key West, Miami, Hollywood, and beyond. Designers and developers seek them out not only for their premium products but for their unmatched expertise and problem-solving capabilities.

They don't just sell hardware, but deliver a fully immersive, hands-on experience. From the initial selection process to project completion, which can span weeks, months, and for some large projects even years, Gaspar & Co. is actively involved every step of the

way, ensuring each detail aligns with your vision.

The team at Gaspar & Co. understands that choosing hardware can often feel overwhelming—especially since no two homes are the same. That is why they work closely with each client to simplify the process and tailor solutions to their unique needs. Because of their technical expertise, manufacturers often refer them for complex and challenging projects. As a result, Gaspar & Co. has the privilege of working on distinctive homes across both Florida coasts and internationally.

Gaspar & Co. is highly selective in choosing the manufacturers it represents. They have long-standing relationships with the vendors they select to partner with for distribution. It is important to them to provide products from both reputable and quality manufacturers who stand behind their products 100%. They have clients who make significant investments in their cabinet and door hardware, and they ensure that the products they select meet their minimum guidelines.

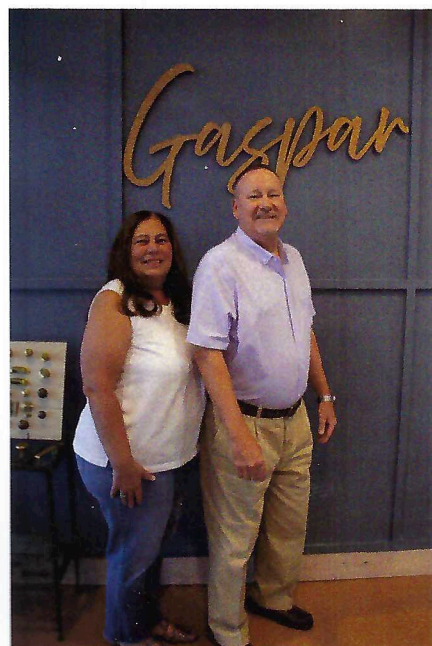

Rebuilding after the hurricanes has been a challenge for so many in our community. With countless homes in need of renovation or complete reconstruction, Gaspar & Co. is here to help make the process smoother. They understand how daunting it can feel, and they strive to make the client experience as seamless and stress-free as possible.

What sets Gaspar & Co apart is the powerhouse team behind it.

Judy Mulloy holds a national Architectural Hardware Certification and is a past Chapter President of the Door and Hardware Institute. With a deep passion for preservation, she has contributed to numerous historic restorations.

Dan Mulloy brings a strong foundation in metallurgy and hardware manufacturing. His innovative mindset led to the production of the world's first solid titanium doorknob in 2005. As a consultant to global hinge manufacturers, Dan continues to push the boundaries of what's possible in decorative hardware.

With the addition of Ashley McBride, Judy's eldest daughter, Gaspar & Co. has reached new heights by bringing the

next generation into the fold. As a prior educator, Ashley's communication and organization skills have made her highly popular within the design community. Ashley, Dan, and Judy are factory-trained and certified, making them most appealing to interior designers, builders, architects, and homeowners alike.

Judy and Dan are proud members of The Tampa Club and enjoy life in Tampa alongside their Pekingese, George. They enjoy nature, birding, fishing, and spending their downtime in the Bahamas.

Ashley and her husband Shawn reside in Tampa with their three children. She enjoys photography, gardening, and volunteering in her local church.

### **Tips for Homeowners Looking to Purchase New Cabinet Hardware:**

- Bring any photographs or elevations with you to our showroom
- Don't wait! We want you to have as many choices as possible, and last minute ordering can limit you.

**Being a small family business allows the team at Gaspar & Co. the flexibility to accommodate individual needs.**

- If you want to change your hardware, but keep your cabinets, you can!
- Tips for Homeowners Looking to Purchase New Door Hardware:
- Measure, measure, measure! If you're close by, we can stop by and assist.
- New doors? Connect with us to choose your hardware first so we can coordinate how your door needs to be machined.
- French/Patio door hardware can be changed! We have a helpful guide to get you the style you love.
- Consider purchasing a lifetime or living finish for the exterior of your home. Our Florida environment is harsh.

Being a small family business allows the team at Gaspar & Co. the flexibility to accommodate individual needs. If you need an appointment outside of their set hours, let them know! Judy, Dan, and Ashley are always happy to meet with you! Whether you're building new or preserving the past, **Gaspar & Co.** is your partner in delivering hardware that makes a statement.
